

Product datasheet: Space heater to Regulation (EU) No 811/2013 (S.I. 2019 No. 539 / Programme 2)

		TTL 15 AS
		190527
Manufacturer		tecalor
Space heating energy efficiency class under average climate conditions, medium- temperature applications		A+
Energy efficiency class, space heating under average climate conditions, low-temperature applications		A++
Rated heating output under average climate conditions for medium-temperature applications (P rated)	kW	8
Rated heating output under average climate conditions for low-temperature applications (P rated)	kW	8
Seasonal space heating energy efficiency under average climate conditions for medium- temperature applications (Ŋs)	%	122
Seasonal space heating energy efficiency under average climate conditions for low- temperature applications (Ŋs)	%	151
Annual energy consumption under average climate conditions for medium-temperature applications (QHE)	kWh/a	5300
Annual energy consumption under average climate conditions for low-temperature applications (QHE)	kWh/a	4303
Rated heating output under colder climate conditions for medium-temperature applications (P rated)	kW	12
Rated heating output under colder climate conditions for low-temperature applications (P rated)	kW	11
Rated heating output under warmer climate conditions for medium-temperature applications (P rated)	kW	4
Rated heating output under warmer climate conditions for low-temperature applications (P rated)	kW	4
Seasonal space heating energy efficiency under colder climate conditions for medium-temperature applications ($\ensuremath{\Pi_S}$)	%	118
Seasonal space heating energy efficiency under colder climate conditions for low-temperature applications ($\ensuremath{\Pi}$ s)	%	137
Seasonal space heating energy efficiency under warmer climate conditions for medium- temperature applications (Ŋs)	%	120
Seasonal space heating energy efficiency under warmer climate conditions for low- temperature applications (Ŋs)	%	153
Annual energy consumption under colder climate conditions for medium-temperature applications (QHE)	kWh/a	9481
Annual energy consumption under colder climate conditions for low-temperature applications (QHE)	kWh/a	7727
Annual energy consumption under warmer climate conditions for medium-temperature applications (QHE)	kWh/a	1750
Annual energy consumption under warmer climate conditions for low-temperature applications (QHE)	kWh/a	1367
Sound power level, outdoor	dB(A)	50

ENERGY

TTL 15 AS

Product datasheet: Space heater to Regulation (EU) No 811/2013 (S.I. 2019 No. 539 / Programme 2)

		TTL 15 AS
		190527
Manufacturer		tecalor
Seasonal space heating energy efficiency under average climate conditions for low-temperature applications (η s)	%	151
Temperature control class		VI
Contribution of temperature control to space heating energy efficiency	%	4
Space heating energy efficiency of package under average climate conditions	%	126
Space heating energy efficiency of package under colder climate conditions	%	122
Space heating energy efficiency of package under warmer climate conditions	%	124
Value of differential between space heating energy efficiency under average climate conditions and that under colder climate conditions	%	4
Value of differential between space heating energy efficiency under warmer climate conditions and that under average climate conditions	%	2
Energy efficiency class, space heating under average climate conditions, low-temperature applications		A++
Space heating energy efficiency class of package under average climate conditions		A++

Product datasheet: Space heater to Regulation (EU) No 811/2013 (S.I. 2019 No. 539 / Programme 2)

Manufacturer		tecalor
Heat source		Außenluft
With auxiliary heater Combination heater with heat pump		<u>x</u>
Rated heating output under colder climate conditions for medium-		
temperature applications (P rated)	kW	12
Rated heating output under average climate conditions for medium- temperature applications (P rated)	kW	8
Rated heating output under warmer climate conditions for medium- temperature applications (P rated)	kW	4
Tj = -7 °C heating output, partial load range under colder climate conditions (Pdh)	kW	7,0
Tj = -7 °C heating output, partial load range under average climate conditions (Pdh)	kW	7,1
$Tj = 2 \ ^{\circ}C$ heating output, partial load range under colder climate conditions (Pdh)	kW	4,2
$T_j = 2 \text{ °C}$ heating output, partial load range under average climate conditions (Pdh)	kW	4,2
$T_j = 2 \text{ °C}$ heating output, partial load range under warmer climate conditions (Pdh)	kW	4,0
$T_j = 7$ °C heating output, partial load range under colder climate conditions (Pdh)	kW	4,3
Tj = 7 °C heating output, partial load range under average climate conditions (Pdh)	kW	4,2
Tj = 7 °C heating output, partial load range under warmer climate conditions (Pdh)	kW	3,9
Tj = 12 °C heating output, partial load range under colder climate conditions (Pdh)	kW	4,1
Tj = 12 °C heating output, partial load range under average climate conditions (Pdh)	kW	4,0
$T_j = 12$ °C heating output, partial load range under warmer climate conditions (Pdh)	kW	3,8
Tj = dual mode temperature under colder climate conditions (Pdh)	kW	7,9
Tj = dual mode temperature under average climate conditions (Pdh)	kW	7,4
Tj = dual mode temperature under warmer climate conditions (Pdh)	kW	4,0
Tj = operating temperature limit under colder climate conditions (Pdh)	kW	11,4
Tj = operating temperature limit under average climate conditions (Pdh)	kW	7,0
Tj = operating temperature limit under warmer climate conditions (Pdh)	kW	4,0
For air source heat pumps: Tj = -15 °C (if TOL< -20 °C) (Pdh)	kW	7,0
Dual mode temperature under colder climate conditions (Tbiv)	<u> </u>	-10
Dual mode temperature under average climate conditions (Tbiv) Dual mode temperature under warmer climate conditions (Tbiv)	2° 2°	-8
